Portfolio: <https://vivekmenon.online/> | LinkedIn: [linkedin.com/in/vivek-menon-69773232a](https://www.linkedin.com/in/vivek-menon-69773232a)

PROFESSIONAL SUMMARY

Full-stack software developer with hands-on experience building and shipping production web applications across the stack — Python/Django and Django REST Framework on the backend, React/Next.js and TypeScript on the frontend, with MySQL and PostgreSQL for data. Comfortable owning a feature end to end: schema design, REST APIs, authentication (JWT, OAuth), and UI implementation. Backed by solid CS fundamentals in OOP, data structures, and software engineering practice, plus a track record of leading teams under pressure at national-level tech and innovation competitions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++, PHP

Web & Frameworks: Django, Django REST Framework, React, Next.js, HTML5, CSS3, Bootstrap

Databases: MySQL, PostgreSQL

Tools & Cloud: Git/GitHub, AWS (EC2, Elastic Beanstalk, CloudWatch), VS Code, Figma

Core Concepts: OOP, Data Structures & Algorithms, RESTful APIs, JWT & OAuth Authentication, Software Development Life Cycle (SDLC), Agile Methodology, ML Fundamentals

INTERNSHIP EXPERIENCE

Soft Solutions, Ernakulam — Python Developer Intern

Deloitte — Data Analytics Job Simulation

PROJECTS

Excellence Grid — Marian Best Class Evaluation System | Live Project

URL: <https://excellence.marian.cloud/>

Next.js 14, React, TypeScript, Django REST Framework, PostgreSQL

- Built a multi-tier web platform to score, rank, and audit classes across academic, co-curricular, and extracurricular performance.
- Designed a 7-stage approval workflow — student submission, representative verification, teacher endorsement, evaluator scoring, evaluator review, and leaderboard publication.
- Implemented JWT and Google OAuth authentication, automated indexing, and audit-trail logging for secure, transparent tracking.

TurfTime — Sports Turf Booking Platform

Python, Django, MySQL

- Built a full-stack booking system with online reservation and real-time scheduling.
- Engineered dynamic Peak Day / Peak Hour pricing logic for high-demand periods.
- Implemented real-time slot-availability checks and booking-conflict prevention.

Machine Learning–Based Prediction System

Python, Scikit-Learn, Pandas, NumPy

- Built a predictive analytics pipeline over historical datasets using supervised ML algorithms.
- Handled data preprocessing, feature engineering, model training, and evaluation.

EDUCATION

Marian College Kuttikkanam — Master of Computer Applications (MCA) 2025 – 2027

St. Antony's College Peruvanthanam — Bachelor of Computer Applications (BCA) 2022 – 2025

ACHIEVEMENTS

- First Runner-Up — National Entrepreneurship Challenge (NEC) 2024, organized by IIT Bombay.
- Semi-Finalist — Eureka, Asia's largest business model competition, selected from 25,000+ participants.
- Contributed to the PG Best Class recognition through academic coordination and leadership.
- "Galactic Problem Solver" recognition — NASA International Space Apps Challenge 2025, Amal Jyothi College of Engineering.

VOLUNTEERING & LEADERSHIP

- Department Student Convener, PG Dept. of Computer Applications, Marian College.
- Technical Team Head, Set Sail 2026 — the Marian freshers induction programme.
- Media Handler, E-Cell, SAC Peruvanthanam.
- Co-organized the Illuminate Entrepreneurship Bootcamp in association with E-Cell IIT Bombay.
- National Service Scheme (NSS) Volunteer, College Level.
